

NestyStay

Platform Specification & Statement of Work | v5.2

Jamaica & Caribbean | Web-Based | All Devices

Terrence Davis, Founder | March 2026 | Z54-248-2435 (WhatsApp, Telegram / WeChat)

1. What Is NestyStay

NestyStay is a trust-based short-term rental platform built for Jamaica and the Caribbean. It connects property owners, guests, local businesses, service providers, and property managers on one verified ecosystem — with identity checks, trust badges, a police wellness program, and a full Property Manager suite built in.

What makes it different:

- Trust badges guests can see and filter by
- Property Manager portal — manages multiple owners and units from one dashboard (the strategic engine of the platform)
- Booking flow with identity verification — booking stays pending until guest ID is confirmed, then approved
- Off-duty JCF police wellness checks — bookable privately through the platform
- Local business and service provider directories built into every listing
- QR code entry system for gated communities and gate guards
- Guest identity verification as an optional host-paid upsell (\$0.14/booking)
- Insurance integration with InsuraGuest — no damage deposits needed

Platform is web-based first, responsive on all devices. Booking section live before end of March 2026. Logo trademark filing before April 2, 2026.

Scope review - Founder and developer first. Frontend developer joins after scope is fully locked and agreed.

2. Booking Flow — Popup & Pending Verification

This is a core part of the NestyStay experience. When a guest views a listing and is ready to book, the following flow runs:

Step	Stage	What Happens
1	View Listing	Guest browses property listing page
2	Book Now Popup	Guest clicks Book — a popup appears with property summary, dates, price breakdown, and a Book Now button
3	Identity Check Triggered	Guest is prompted to complete Alibaba eKYC — government ID upload + liveness check
4	Booking Marked	Booking is created immediately and marked as PENDING — dates are

ATA

	PENDING	held, host is notified
5	Verification Processing	Alibaba Cloud processes the ID check (typically instant to a few minutes)
6	Booking APPROVED	Once ID is verified, booking status changes to APPROVED — guest and host both notified
7	Payment Processed	Payment is charged only after verification passes and booking is approved
8	Booking REJECTED	If verification fails, booking is cancelled, dates released, guest notified

Additional notes:

- The host only pays the \$0.14 eKYC cost if they have enabled the guest verification upsell on that property
If host has NOT enabled guest verification, guest still sees the booking popup and books normally — no ID check triggered
The PENDING state holds the dates for a defined window (e.g. 30 minutes) to prevent double bookings during verification
- All booking statuses — PENDING, APPROVED, REJECTED — are visible in both the guest and host dashboards in real time

3. Economics & Fee Structure

If a guest pays for host verification, hosts choose to pay for guest verification. Guests are never charged for verification.

Who		
NestStay	\$0.14 / host	Covers host eKYC — Alibaba Cloud identity verification
Host	50 to list	Always free. Host keeps 97% of every booking.
Host	3% commission	Platform fee per booking
Host (optional)	\$49 one-time	Trusted badge — unlocks Trades directory
Host (optional)	\$0.14 / booking	Guest verification upsell — host's choice per property
Host (optional)	\$25-\$50 / visit	Police wellness check per visit
Host (optional)	\$19 / month	Wellness subscription — includes 1 visit/month
Guest	9% platform fee	Added at checkout on top of nightly rate
Police officer	\$0 — waived	Earns commission per completed wellness visit
Service providers	\$0 to join	All directories free to enter
Property Manager	Monthly subscription	Tiered by portfolio size — recurring platform revenue
Community Manager	SO — free	Free access, encourages community oversight

2/14

4. Host Badge Levels

Four levels. All keep 97% payout. Each level unlocks more of the platform.

Level	Cost	Requirement	Unlocks
FREE	\$0	Basic profile + photos	Listings, calendar, messaging, QR code access, 97% payout
VERIFIED	\$0 (NestyStay pays 50.14)	Government ID via Alibaba eKYC	Verified badge. Custodian directory, Local Business directory, Guest verification upsell
TRUSTED	\$49 one-time	Verified + 3 bookings	Trusted badge, Trades directory, search boost, referral program
WELLNESS	\$2W50/visit or \$19/month	Verified + property address	Police directory, wellness visits, in-person guest ID check, Wellness badge, Police Verified filter

5. Feature Comparison by Badge Level

Feature	FREE			
Host keeps 97% payout	YES	YES	YES	YES
NestyStay pays eKYC (\$0.14)	NO	YES	YES	YES
Verified badge on profile	NO	YES	YES	YES
Guest verification upsell (\$0.14)	NO	YES	YES	YES
Booking popup with pending verification	YES	YES	YES	YES
QR code gate access	YES	YES	YES	YES
Custodian directory (cleaners)	NO	YES	YES	YES
Local <i>business</i> directory	NO	YES	YES	YES
Trades directory (electricians etc.)	NO	NO	YES	YES
Search ranking boost	NO	NO	YES	YES

6. Property Manager — The Strategic Core

This is not optional. the Property Manager is the engine that drives owner acquisition. One property manager brings multiple owners into the platform at once. Without it, the growth

A Property Manager on NestyStay manages multiple property owners and their units from a single dashboard. They are the bridge between the platform and the real owners. This is fundamentally different from NestyRest — one manager onboarded means multiple owners and listings activated at once.

What the Property Manager Can Do

Tool	What it Does
Multi-Owner Dashboard	Manage multiple property owners and their listings from one login
Community Board	Post announcements and notices to all owners in a building or complex
Gate Communication	Send and receive messages directly with gate guards
Invoicing & Statements	Generate invoices, maintenance bills, and financial statements per owner
Owner Portal	Each owner logs in separately to see <i>their</i> balance, bookings, and pay fees online
Maintenance Tracking	Log, assign, and track repair and maintenance requests
Utility Tracking	Allocate and bill back utilities to individual owners or units
Tenant & Owner Verification	Verify new owners and tenants joining the building or complex
Document Storage	Store strata rules, meeting minutes, and community documents
Subscription Billing	Monthly subscription based on portfolio size — <i>recurring platform</i> revenue

Property Manager vs. Individual Host

	Individual Host	Property Manager
Manages	Their own property only	Multiple owners and their properties
Login	Single account	One account, many owners
Invoicing	Not available	Full invoicing suite
Owner portal	Not applicable	Each owner has their own view
Community board	Not available	Available
Utility tracking	Not available	Available
Pricing model	Badge-based fees	Monthly subscription
Brings in other owners	No	Yes — this is the whole point

7. Service Providers & Police Wellness

Directories — Four Types, All Free to Join

Directory		Examples	Badge Required
CUSTODIAN	Individuals + companies	Cleaners, housekeepers, laundry, VERIFIED window cleaners	
TRADES	Individuals + companies	Electricians, plumbers, HVAC, handymen, gardeners, painters	TRUSTED
LOCAL BUSINESS	Brick-and-mortar only	Restaurants, tour ops, gift shops, transport, water sports, photography	VERIFIED
POLICE	Active off-duty JCF only	Available by parish, shown by ID number only — no names ever	WELLNESS

Police Wellness — Key Rules

Active off-duty JCF officers only — no retired officers
Officers get Verified + Trusted badges FREE — no fees ever
Officers shown by badge/ID number *only* — name never shown to anyone
No direct contact — all communication through platform only
Host pays per visit; platform holds in escrow; officer paid after photo report submitted
Guests, businesses, and the public cannot see or book police
All Jamaica listings display emergency number 119 prominently

Guest Verification Upsell

- Available to Verified hosts and above — enabled per property, never automatic
Guest completes Alibaba eKYC — host is charged \$0.14, guest pays nothing
Booking stays PENDING until verification passes, then moves to APPROVED
- Pricing: \$0.14/booking | \$1.26 for IO-pack | \$2.99/month | \$29.99/year

8. Alibaba Cloud eKYC + InsuraGuest Insurance

Alibaba Cloud eKYC — Already Integrated on NestyRest

Region / Endpoint	en-hongkong https://cloudauth-intl.cn-hongkong.aliyuncs.com
Product / Document	eKYC_PRO 01000000 (Global Passport)
Cost per check	\$0.14 USD
Who pays — host	NestyStay
Who pays — guest	Host (optional upsell)
Who pays — police	NestyStay (waived)
Rollout order	NestyRest first, then NestyStay full rollout

InsuraGuest — Short-Term Rental Insurance

Optional insurance add-on in host dashboard. Removes damage deposits and waiver forms entirely

Plan	Coverage
\$50/month (non-US)	\$10K property damage
\$69/month (US)	\$10K property damage * \$10K accidental medical
\$99/month (US)	\$25K property damage + \$25K accidental medical

- No contracts — month-to-month | Claims within 72 hours | Includes death benefit
No damage deposits or waiver forms required from guests

9. Development Phases

Priority: *Booking section w/ a pending/approved verification flow live before end of March 2026.*

S	Phase	Deliverables
1	Core	Registration, login, 2FA, Alibaba eKYC, property listings, booking popup with PENDING/APPROVED/REJECTED flow, Stripe payments — web, all devices
2	Badges	All 4 badge levels, annual renewals, automated review engine, owner dashboard, authenticator app 2FA
3	Wellness	Active off-duty JCF officer onboarding, wellness booking, photo reports, commission processing
4	Directories	Custodian, Trades, Local Business, Police directories; all provider dashboards; guest verification upsell
5	Property Manager	Multi-owner dashboard, community board, gate comms, invoicing, statements, maintenance tracking, owner portal, utility tracking, document

6 storage, subscription billing
Mobile Apps iOS + Android with biometric 2FA, officer portal, gate guard interface

10. Technology Stack

Layer	Technology	Purpose
Frontend	React.js / Next.js	Web app —all devices
Mobile (Phase 6)	React Native	iOS and Android
Backend	Node.js / Python	API services
Database	PostgreSQL	Primary data store
Auth	Auth0 / JWT + 2FA	Login, sessions, 2FA
Identity	Alibaba Cloud eKYC	\$0.14/check — government ID + liveness
Hosting	Alibaba Cloud SAS	App + file hosting
CDN / Security	Cloudflare	Performance + DDoS protection
Payments	Stripe / PayPal	PCI-compliant, escrow, payouts
Notifications	Firebase + Twilio + AWS SES	Push, SMS, email
Insurance	InsuraGuest	Optional host insurance integration

11. Payment Milestones — \$3,000 Total

Total: \$3,000 USD — 5 equal payments of 600 each, one per phase. Each payment is due upon delivery of that phase. No upfront payment. Code is pushed to the client's GitHub repository after each payment is confirmed. The developer manages and maintains the repository throughout the project.

Repository: Created and owned by the client (Terence Davis/ NestyStay). Developer is granted access and manages all pushes. Client has full visibility at all times.

\$600	Phase 1 — Core Booking System Live	User registration, login, 2FA live. Alibaba eKYC integrated. Property listings working. Booking popup with PENDING / APPROVED / REJECTED flow. Stripe payments processing. Fully web-based on all devices. (Target: end of March 2026.) All code pushed to client repo upon payment.
\$600	Phase 2 — Badge System Live	Officer onboarding and verification. Wellness booking system. Scheduled visits with photo report submission. Commission processing and payouts to officers. All code pushed to client repo upon payment.
\$600	Phase 3 - Wellness Features Live	All 4 badge levels live with annual renewal logic. Automated review engine. Wellness program: officer onboarding, booking system, photo reports, commission payouts. All code pushed to client repo upon payment.
\$600	Phase 4 — Directories Live	Custodian, Trades, Local Business, and Police directories live. All provider dashboards. Guest verification upsell active. Full QR code entry system. All code pushed to client repo upon payment.
5600	Phase 5 — Property Manager + Final Delivery	Full Property Manager suite: multi-owner dashboard, community board, gate comms, invoicing and statements, owner portal, maintenance tracking, utility tracking, document storage, subscription billing. Platform tested, reviewed, and ready for public launch. All code pushed to client repo upon payment.
